XLEAR PRO-ACTIVE HEALTH, THE LEADING MANUFACTURER OF XYLITOL-BASED PRODUCTS IN NORTH AMERICA

For over 20 years, Xlear Pro-Active Health has been providing the newest innovations in drug-free OTC upper respiratory care with its industry leading **Xlear Nasal Spray**. Xlear uses xylitol, a sugar-free sweetener that has been shown to reduce the ability of many bacteria to adhere to tissue. Without being able to adhere, bacteria are more easily washed away.

Additionally, Xlear Pro-Active Health has developed **Spry Dental Defense**, an on-the-go oral care system designed for all-day oral protection. Spry uses the sugar-free sweetener xylitol, which has been shown to reduce the ability of bacteria to adhere to teeth and gums. Without the ability to adhere, bacteria are less likely to form tooth damaging colonies.
